Developer

## PROJECTS/HACKATHONS

Web Developer and Data Analyst

### FarmEz

-Start-a-thon project

Website: [www.farmez.com](http://www.farmez.com)

Designed and developed FarmEz website from start to finish using **Flask** and Python (libraries and frameworks applied - **Pandas, NumPy, Matplotlib** etc.) and also used **MongoDB** for database management.

Primarily responsible for creating user-friendly interfaces, interactive maps, and provide **data-driven insights**.

Python Web Developer

### Olympiverse

-Geek-a-thon project

Website: [www.olympiverse.com](http://www.olympiverse.com)

Conceptualized and engineered OlympicsVerse, a dynamic Olympic Games analysis platform, utilizing Flask and Python with integrated libraries such as **Pandas, NumPy, Plotly** and **Socket.io**.

Incorporated **MongoDB** for streamlined **database management**.

Spearheaded creation of intuitive user interfaces and interactive **visualizations**, fostering data-driven exploration.

YouTube Video Link & GitHub project details

Full Stack Web Developer

### Medilarm

-Personal project

Github: <https://github.com/omwadera/Medilarm>

Crafted a dynamic medication scheduling web application using **Flask, MongoDB**, and **Werkzeug**.

Managed secure file uploads, implemented scheduled reminders, and created seamless UX/UI designs. Enhancing adherence to medication routines, the project demonstrates proficiency in **Flask-based development**.

Visit Live Site to explore.

## SOFT SKILLS

- Team Work
- Communication
- Positive Attitude
- Multi-tasking
- Time Management
